

## **Black Behavior in New Orleans** **Coming Soon to a City Near You!**

We were, of course, outraged about the awful behaviors of Black people in New Orleans in the aftermath of hurricane Katrina. After all, what kind of people shoot at rescuers who are trying to save them? Or carjack vehicles that are evacuating the hurricane victims? Or smoke crack cocaine, or commit various other crimes, inside of temporary refugee centers? And looters not stealing things like food and drink to survive but stealing electronics, jewelry, and guns from local stores.

By Wednesday, the Superdome had degenerated into unspeakable horror. At least two people, including a child, have been raped as the arena darkened at night. At least three people have died, including one man who jumped 50 feet to his death, saying he had nothing left to live for. Sniper fire threatened hospital evacuations and a mass bus caravan to Texas, corpses were found outside the city's decaying convention center and weakened refugees collapsed amid enraged crowds on city streets with reports of actual cannibalism of people feeding on corpses.

Other deaths were reported nearby, and there was an increasing number of accounts of rapes and beatings, city officials said. Louisiana National Guard soldiers chased refugees and stragglers away from the intersection of Loyola Avenue and Girod Street in the heart of New Orleans. An unseen sniper holed up in a nearby building fired sporadically at soldiers and pedestrians. In the flood-swept city center, another distant gunman hidden in a high-rise terrorized doctors and patients at Charity Hospital as staff worked feverishly to evacuate critically ill patients. "Sniper! Sniper! Sniper!" nurses screamed as shots drove them back into Charity's emergency room.

Time to choose sides, White man. New Orleans isn't the only area of the U.S. that's a war zone due to lawless nonWhites. Illegal Mexicans are responsible for the Huntsville, Alabama shooting of Police Officer Daniel Golden. Illegal Mexicans near Yuma, AZ brought down a border patrol helicopter by throwing rocks. The Mexican border is an open highway for terrorists to enter this country.

When Whites become a minority across the country, as they are currently headed towards becoming within our lifetimes, the founding race of Western civilization, the inventors of electricity and running water and medical science, will no longer be able to hold things together. Every city will become like the Superdome. Are you ready for that white man? Is this a worthy destiny for our children? No it is not. The time to act is now!

*"We must secure the existence of our people and a future for white children."*
